Large, sturdy and fun zip line system. This version of Playground cable-way is suitable for level ground or areas with a slight slope. The starting station includes a small two-level tower and an inclined ramp for gaining momentum. The launch platform is positioned about 100 cm above the ground, from which users take off along the steel cable using a rubber seat. The cable way seat, made of stainless steel, is equipped with an automatic brake and end-of-line spring. The seat, made of shock-absorbing rubber, is connected to the trolley with a chain protected by a rubber tube. The load-bearing cable is made of high-strength spiral steel. The uprights are made of large-section laminated wood, Ø 200 mm, cylindrical and sanded, connected with hot-dip galvanized steel brackets. The standard length of the course is 30 meters, but other lengths are available upon request.

*All wooden parts are manufactured with conifers coming from forests certified in accordance to PEFC-FSC criteria. The parts are autoclaved according to the EN-351 norms with a water repellent protective product and anti UV filter.*

*This item contains a percentage of plastic lower than 1% of the total weight of the structure*
