H. C. 99

Large and sturdy zip line system, designed for fun. This version is suitable for level ground or areas with a slight slope. The starting station includes a two-level tower and an inclined ramp for a running start. The launch platform is about 100 cm (3.3 ft) above the ground, from which users ride down the steel cable using a rubber seat.

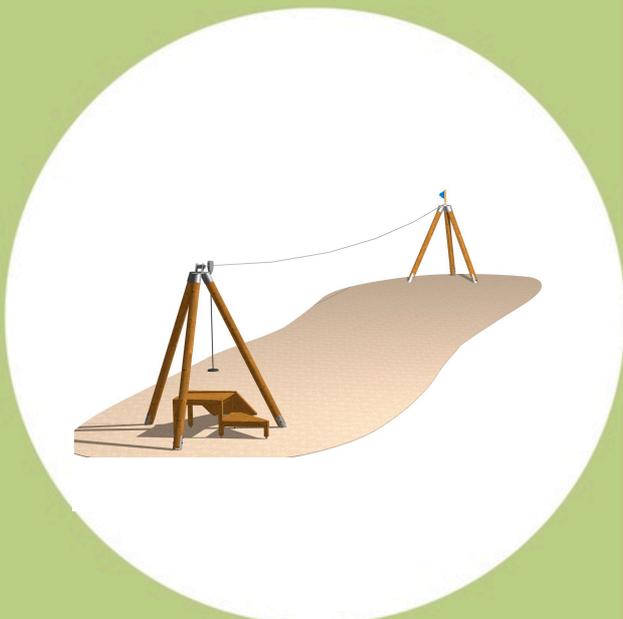

The stainless steel trolley is equipped with an automatic brake and end-of-line spring. The seat, made of shock-absorbing rubber, is attached to the trolley via a chain enclosed in a protective rubber tube. The load-bearing cable is made of high-strength spiral steel. The support posts are made of large-diameter (Ø 200 mm) laminated cylindrical timber, planed and smoothed, and connected with hot-dip galvanized steel brackets. The standard course length is 30 meters (98 ft), but other lengths are available on request.

*All wooden parts are manufactured with conifers coming from forests certified in accordance to PEFC-FSC criteria. The parts are autoclaved according to the EN -351 norms with a water repellent protective product and anti UV filter.*

*This item contains a percentage of plastic lower than 1% of the total weight of the structure*

# PRODUCT PASSPORT

Art. 011228-N Funivia 30 Metri Con 1 Rampa

## EMISSIONS AVOIDED:

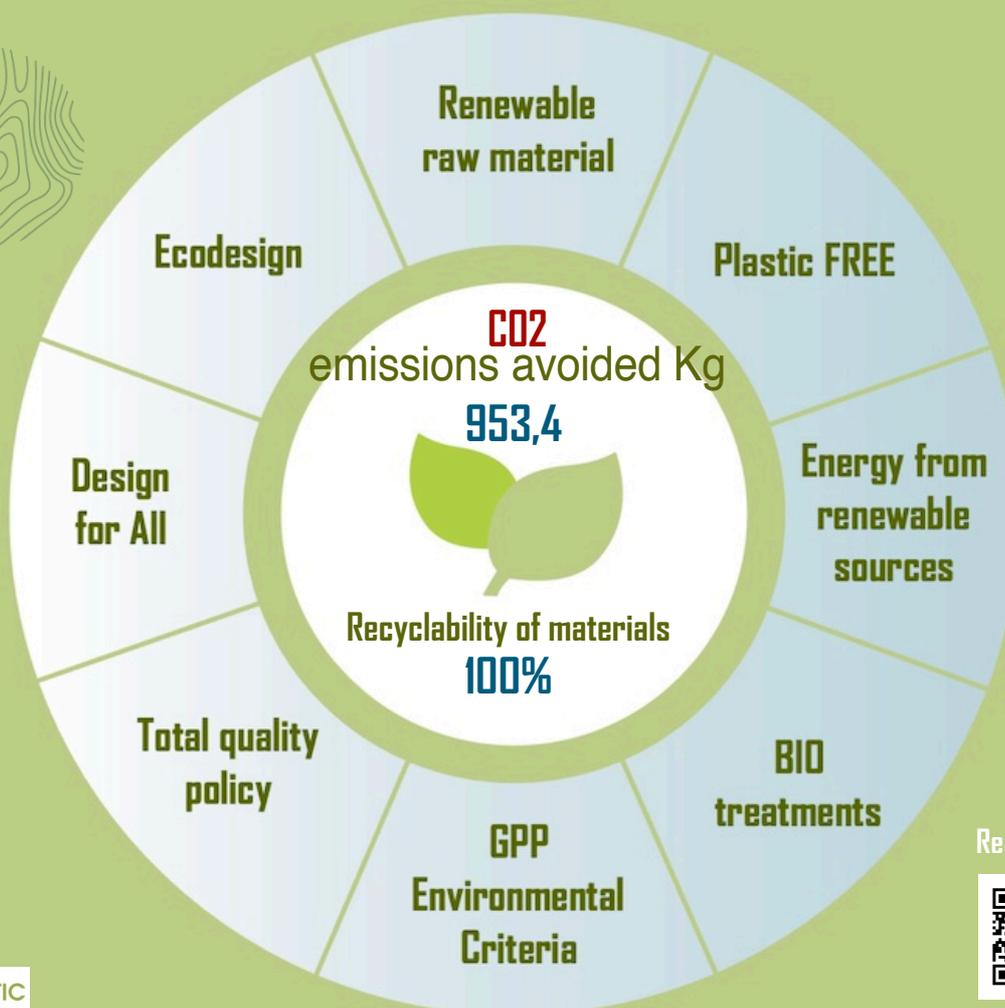

Local wood Kg: 9,8  
Use of clean energy, Kg: 103,6  
CO2 storage, Kg: 840,0  
Bio treatments, Kg: 0,0

Measures:  
300 x 3000 h 380 cm

Safety Area:  
700 x 3800

Fall height:  
99

Age:  
5 - 12
