ADVENTURE RIDE

 **240 x 460 h 120 cm**

 **540x760 cm**

 **6**

 **3-12**

H. C. 40

Path for recreational-motor activity that includes a series of balance and motor skill axes.

It is made of Robinia wood, trunks with an average diameter of Ø 13-16 cm with a completely debarked surface, free of sapwood and sanded. The trunks are worked by hand maintaining their irregular profile for optimal inclusion in a natural environment such as that of green areas. The tool allows children to experiment with movement on different difficulties. The final trunk includes a "little man" shape which acts as an imaginative stimulus for achieving the goal at the end of the journey. The fixing bars are made of galvanized steel, embedded in the wood without protruding from the structure. The tool must be fixed to the ground using lean concrete blocks. On request they can be supplied longer, for burial without using cement.

Built in Robinia wood harvested in a controlled and sustainable way. The wood is debarked, sapwood removed, sanded and worked by hand to create durable and safe equipment, in compliance with UNI-EN-1176.

Being made of natural Robinia, this article may present a superficial cracking over time which does not cause any problems of durability, functionality and safety.

This item contains a percentage of plastic lower than 1% of the total weight of the structure

PRODUCT PASSPORT

Adventure Ride

EMISSIONS AVOIDED:

Local wood Kg: 1,8

Use of clean energy, Kg: 18,5

CO2 storage, Kg: 150,0

Bio treatments, Kg: 0,0

Measures:
240 x 460 H 120 cm

Safety Area:
540x760 cm

Fall height:
40

Age:
3-12
