System for recreational and motor activities made of Robinia wood.
System for recreational motor activities made of Robinia wood with trunks with an average diameter of Ø 14-16 cm. The tool allows children to experiment with movement on different difficulties by walking on logs positioned at different distances and heights from each other. The tool includes two ropes with a metal core that facilitate crossing the path.

Built in Robinia wood harvested in a controlled and sustainable way. The wood is debarked, sapwood removed, sanded and worked by hand to create durable and safe equipment, in compliance with UNI-EN-1176.

Being made of natural Robinia, this article may present a superficial cracking over time which does not cause any problems of durability, functionality and safety.

This item contains a percentage of plastic lower than 1% of the total weight of the structure
