H. C. 150

Play system made of Robinia wood and composed of a multi-function tower that includes multiple activities arranged on the ground and on two play surfaces located 15 and 150 cm from the ground.

Access is via a ladder (or a net), the upper floor is protected by sturdy wooden balustrades, the descent is via a steel slide H100 cm and 200 cm long. The raised platform is made up of sturdy Robinia wood beams and 30 mm thick boards. The tower has a characteristic asymmetrical gable roof. The supporting structure of the game is made of Robinia trunks with an irregular diameter of 14-20 cm. The slide is made of stainless steel with side rails. The structure must be fixed to the ground using concrete foundations.

Built in Robinia wood harvested in a controlled and sustainable way. The wood is debarked, sapwood removed, sanded and worked by hand to create durable and safe equipment, in compliance with UNI-EN-1176.

Being made of natural Robinia, this article may present a superficial cracking over time which does not cause any problems of durability, functionality and safety.

This item contains a percentage of plastic lower than 1% of the total weight of the structure
