 3 - 12

H. C. 150

Tree-shaped tower with a roof. It can be accessed by a wooden ladder with side protections. The 150cm high platform has a large surface area of 1.6 square meters allowing 4-6 children to play at the same time. The polyethylen slide is 310cm long. The trunk section is made of laminated wood 18x50 cm with 9 cm thick branches. Ground connection by a galvanized steel bracket which keeps the timber lifted off the ground. The raised platform is composed of laminated beams section 9x9 cm and 3.5 cm thick planks. The panels that make up the crown are made of laminated wood thickness 27 mm with decorations and windows. The colour of this playground equipment is specifically designed to be inserted correctly into the natural areas of public parks, schools and parks.

All wooden parts are made of FSC- PEFC certified wood, treated under pressure in according to the EN 351 standards with UV protection. Complies to EN 1176 (European Standar for Playgrounds Equipment and Surfacing.

This item contains a percentage of plastic lower than 1% of the total weight of the structure
