Art. 011573 TREE CASTLE 4

√ 405x645 h328 cm

739x933 cm

(iii) 14

★★ 3 - 12

H. C. 150

Tree-castle with two treeformed towers with roofs. It can be accessed by an inclined wooden ramp with trunks and a rope. The wide platforms are posed at 100 and 150cm from the ground. The polyethylen slide is 210cm long. The two trees are connected by a trunk-bridge with lateral net protection. The trunks of the trees are made of laminated wood 18x50 cm with 9 cm thick branches. Ground connection by a galvanized steel bracket which keeps the timber lifted off the ground. The raised platforms are made of laminated beams section 9x9 cm and 3.5 cm thick planks. The panels that make up the crown are made of laminated wood thickness 27 mm with decorations and windows.

conifers coming from forests certified in accordance to PEFC-FSC criteria. The parts are autoclaved according to the EN -351 norms with a water repellent protective product and anti UV filter.

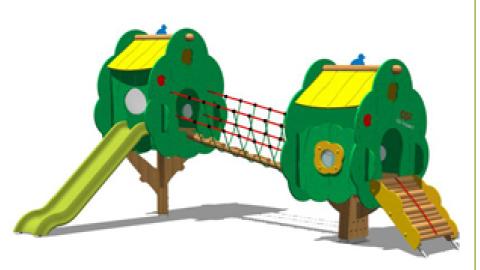

All wooden parts are manufactured with

The higher tree as a transparent panoramic porthole.

The colour of this playground is specificallyy designed to be inserted correctly into the natural areas of public parks, schools and parks.
