is the evolution of the TREES line of Legnolandia which includes 25 articles of different sizes and suitable for different ages. This play equipment is ideal for characterizing large areas as shopping centers, urban parks, beaches, squares in any public or private space. The gaming activities are simple and risk-free, the main play aspect is based on the rewarding achievement of a considerable height from the ground but in a safe for children aged 5 years and older. The access devices to the large panoramic tower with slide are designed to enhance the achievement of the goal and prevent access to younger children. The internal climb takes place through the use of adventurous wood steps ladders, which allow the ascent to only one user at a time and make access easy and safe. Even adults can access the facility, for maintenance or for the control of the game phases.

*Thanks to a production that uses only energy derived from renewable sources and use of controlled picking timber (PEFC-FSC certified forests) and obtained per km.*

*Zero, Legnolandia is able to effectively break down harmful CO2 emissions. Wood is a renewable and easily recyclable raw material with a low energy tax. The colored parts are made of recycled polyethylene and 100% recyclable. This product meets the needs of the GPP (Green Public*
