Large hexagonal wooden house with large floor, roof and walls with three fun playgrounds. The entrance to the lodge is over two ramps that allow the access and activity also for special needs users. The structure, with six roof sides and wooden raised floor, offers excellent shelter from sun and rain and can also be used to store toys. The indoor playgrounds include a magic mirror, a figurative panel and a three-figure rotating panel with colorful designs and woodcarved figures. The structure of the playground is made of wood in opposed 90x90 mm thick sections with galvanized steel brackets for fixing to the ground. The colour of the playgrounds is specifically designed for a correct insertion into the nature of public parks and schools.

All wooden parts are realized in Abilam-pine wood that comes from controlled forests, according to the EN 351 standards, autoclave treated with water repellent EXTRA-COAT and UV protection.

PLAY FOR ALL

PLAY FOR ALL is the european project of the CEN (*European Committee for Standardization*) and the FEPI (*Federation of the European Play Industry*) where Legnolandia is active component. The aim is to integrate the inclusive accessibility parameters to the general safety standards of playgrounds EN 1176.

The guidelines that emerge from this project are already being applied to Legnolandia's production. Like this we create playgrounds that can be used by everybody together in an inclusive way, independently from physical and mental capacities. and wherever possible without any necessary external help.

INCLUSIVE ACTIVITY:

The wide hexagonal house is accessible for all children - even with wheelchairs, thanks to two ramps on opposite sides of the house.

The sensorial games that are located on the walls are also accessible to any user, either from the inside or from the outside. The proposed activities favour the learning, aggregation and socialization process.

The padiglion shaped roof protects from sun and rain and allows the kids to have a "private" room for them where they feel inside of the game.

The dimensions of the structure do also allow the access and presence of care taking persons which can sit on the inner bench.

Accessibilty Index **100%**
